

## Summary

### **Feature Upgrades**

- **Feature Upgrade: Drive Recorder**
- **Feature Upgrade: Welcome Light Animation available in ConnectedDrive Upgrades**
- **Feature Upgrade: Welcome Light Animation**
- **Feature Upgrade: Central Display**
- **Feature Upgrade: Safety-Related Assistance Systems**
- **Feature Upgrade: Active Navigation Guidance**
- **Feature Upgrade: Exterior Light Functions**
- **Feature Upgrade: BMW Navigation System**
- **Feature Upgrade: AirConsole Now Part of BMW Digital Premium**

### **Quality improvement:**

- **Quality improvement: Optimized drive-off behavior**
- **Quality improvement: Central Display**

### **Service Tasks:**

- **Service Task: Programming fuel tank control unit**
- **Service Task: Electric Drive Software Update**
- **Service Task: AC charging Software Update**
- **Service Task: Air Freshener Software Update**
- **Service Task: Navigation Software Update I MGU22**
- **Service Task: Pedestrian Protection Software Update**
- **Service Task: Profile Settings Software Update**

### Feature Upgrade: Drive Recorder

Videos from your Drive Recorder and Anti-Theft Recorder are available in your My BMW App.

### Feature Upgrade: Welcome Light Animation available in ConnectedDrive Upgrades

Enhance Welcome Light Animation with three new options available in the ConnectedDrive store: sporty Allegro, dynamic Adagio, and lively Vivace

### Feature Upgrade: Welcome Light Animation

Enhanced Welcome Light Animation with three new options: sporty and dynamic Allegro, elegant Adagio, and lively Vivace. Choose your preferred variant in addition to the current animations.

## Feature Upgrade: Central Display

This update will personalize your Parking Assistant experience by displaying your chosen BMW Individual two-tone paintwork.

## Feature Upgrade: Safety-Related Assistance Systems

Upgrade improves driving safety with warnings for wrong-way entry and no-turn-on-red at intersections. Additionally, get alerts for potential right-of-way violations at traffic lights and stop or yield signs in select states.

## Feature Upgrade: Active Navigation Guidance

Lane Guiding with Navigation anticipates necessary lane changes required to reach the guided highway exit. It prompts the driver with a “Initiate Lane change to follow route” notification. Upon confirmation the system actively performs lane changes to reach the exit. In certain situations, manual lane changes are required.

**Note:** Driver must check visibility, surroundings, and traffic conditions at all times, intervening when needed, and exercising caution to minimizing accident risks.

### Feature Upgrade: Exterior Light Functions

Customize locking and unlocking effects with this new update. Choose to enable or disable momentary flashing of headlights, with the option to skip Welcome Light Animation.

### Feature Upgrade: BMW Navigation System

When route guidance is active, Augmented View shows you instructions to turn by the navigation system in the central display of your BMW.

### Feature Upgrade: AirConsole Now Part of BMW Digital Premium

Turn waiting times into fun with AirConsole Games on your BMW's Curved Display. Use your smartphone as a controller to enjoy over a dozen games, including racing, quizzes, strategy, and puzzles.

### **Quality improvement: Optimized vehicle drive-off behavior**

The drive-off behavior of the vehicle after engine start-stop situations has been improved with this update. The shifting hesitation has been reduced on initial take off.

### **Quality improvement: Central Display**

This upgrade includes faster start for the operating system, smoother scrolling on the central multifunctional instrument display. Optimized display for the Rear View Camera and general improvements to the software.

### **Service Task: Programming fuel tank control unit.**

The current software version of your vehicle may result in the IFM control unit (tank control unit) exhibiting a malfunction, and therefore an engine start no longer being possible. This is rectified by the upgrade.

### **Service Task: Electric Drive Software Update**

Your vehicle's eDrive motor may experience increased wear, indicated by an acoustic noise near the front axle, a "Drive faulty" message, and potential motor failure. This issue is addressed with a software upgrade.

### **Service Task: AC charging Software Update**

This update addresses AC charging issues over 11kW in the current software version with a software upgrade to prevent interruptions.

### **Service Task: Air Freshener Software Update**

Unlock full use of the interior air freshener after installing the software upgrade. (Not available in the current version)

### **Service Task: Navigation Software Update | MGU22**

The current software version of your vehicle may not download the navigation data correctly. This update corrects this issue.

## **Service Task: Pedestrian Protection Software Update**

**This upgrade enhances acoustic pedestrian protection.**

## **Service Task: Profile Settings Software Update**

**The current software version of your vehicle may cause uninitiated changes to profile-related settings. This update corrects this unwanted behavior in the privacy menu.**
