- **Feature Upgrade: BMW Intelligent Personal Assistant**
- **Feature Upgrade: Key Linking**
- **Feature Upgrade: YouTube Music**

Information:

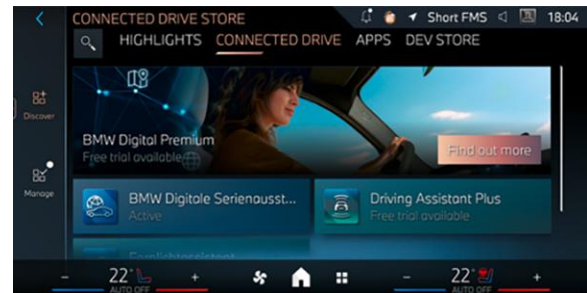

- **Information: Alexa Car Integration**
- **Information: Radio Favorites**

Notes on Remote Software Upgrade

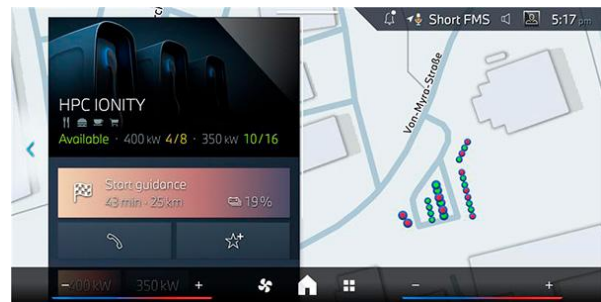

Feature Upgrade: BMW ConnectedDrive Store

The BMW ConnectedDrive Store now features a new, more intuitive user interface. Enhanced visuals and clearer dialog boxes make navigation easier and more convenient. Booking upgrades for your BMW is now faster and simpler than ever.

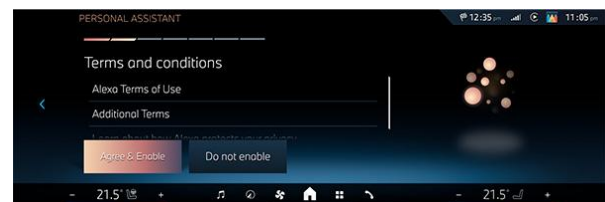

Feature Upgrade: Charging Points

Easily find available charging stations with enhanced charging-point details in navigation. Individual chargers at public charging locations are now displayed separately, showing their current availability and charging power, so you can quickly identify the best option—even at large charging stations.

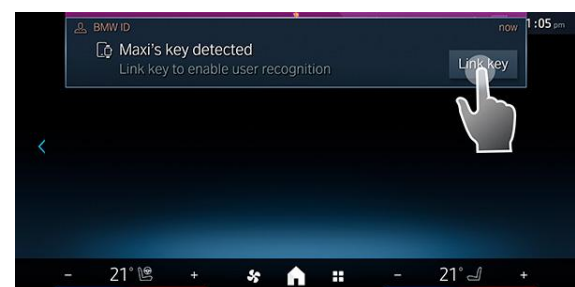

Feature Upgrade: BMW Intelligent Personal Assistant

To continue using the enhanced BMW Intelligent Personal Assistant, complete a one-time setup and accept the updated Terms of Use by pressing the microphone button on the steering wheel. This ensures transparent and secure use while giving you access to the latest language features and an improved user experience.

Feature Upgrade: Key Linking

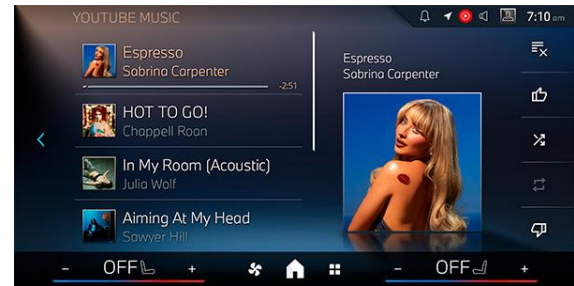

Sharing your BMW with family or friends? Your BMW will now recognize the key and prompt you on the central display to assign it to your profile with a single tap. Once linked, your personal settings will be ready every time you drive.

Feature Upgrade: YouTube Music

With YouTube Music, you can listen to your favorite songs, podcasts, and personalized playlists right in your BMW while you drive. Simply download the app from the BMW ConnectedDrive Store and sign in with your YouTube Music Premium account. It can be used in conjunction with BMW Digital Premium and a YouTube Music Premium account.

Information: Alexa Car Integration

With this update, "Hey Alexa", i.e., Amazon Alexa Car Integration, is no longer supported in vehicles equipped with Operating System 9. Activate the Intelligent Personal Assistant, simply by saying "Hey BMW" or even just "BMW", to interact with music, vehicle functions, and more.

Information: Radio Favorites

After the software upgrade, some saved radio favorites may need to be saved again. If "No Signal" appears when selecting a favorite, simply resave the station. Your favorites will then be available as usual.
