FAQs
Device Compatibility
Go keyless with BMW Digital Key and BMW Digital Key Plus. Your compatible iPhone, Google Pixel or Samsung Galaxy smartphone substitutes for your vehicle's key fob. Simply hold it to the door handle on the driver's side to lock and unlock or, to start the engine, you can place your device in the wireless charging tray. Additionally, users can activate their BMW Digital Key Card; a credit card shaped NFC card.

As the owner you may share your Digital Key with up to five friends or family members*, even if they do not have a BMW ConnectedDrive account or have the My BMW App installed. Shared keys can be sent with optional “Driving Restrictions.” These optional restrictions include top speed limiting and setting the maximum radio volume, for example.

With BMW Digital Key and BMW Digital Key Plus, you can have all of your compatible vehicle keys on your smartphone device, all fully secured by the industry standard of CCC Digital Key.

Please note: The use of this feature is dependent on various preconditions regarding the smartphone hardware, software, and network provider. For more information, please view the BMW ConnectedDrive Service Availability Matrix located at BMWUSA.com/ConnectedDrive.

*Digital Key Shared Key is currently only available for iPhone.
BMW DIGITAL KEY with iPhone.

Within the My BMW App, select the “Digital Key” tile.

On the “Welcome to your Digital Key” screen, select “Start Setting Up Your Digital Key” on the bottom of the screen.

With both vehicle keys inside your BMW, tap the “Continue” button.

When you are ready to pair, select “Start Pairing”.

Getting your phone ready...

How to use your digital key

- Unlock & lock your car: hold the back of your phone to the driver’s door handle.
- Start your car: place your phone on the key reader, then press the Start button.
- If you don't require a screen lock, your key will work for around 3 hours if your phone runs out of battery.

How to unlock and lock your BMW:
Place the back of your device near the driver’s door handle. The exact positioning may vary on the location of your device's NFC antenna.

How to start the vehicle:
Place your device on the console key and then press the Start/Stop button to start the vehicle.

Place your device in the smartphone tray to complete pairing.

Follow the prompts on your Google device to add BMW Digital Key to your Home screen.

Place your device in the Smartphone tray to complete pairing.

Follow the prompts on your Samsung device to add BMW Digital Key to Samsung Pass.
BMW DIGITAL KEY.

Activate BMW Digital Key via Email:

1. Open email containing pairing link.
2. Tap on pairing link.
3. Place device on wireless charging tray.
4. Please wait while Digital Key is created.
5. Your Digital Key is now ready for immediate use.
6. Open Wallet app. Confirm Digital Key is present.
7. Tap ⋮
8. Please note for iPhone device users: Ensure Express Mode is switched on. This allows vehicle access even in the event the smartphone battery dies.
BMW DIGITAL KEY.

Activate BMW Digital Key via iDrive:

1. From the main iDrive home-screen, select: Car > Settings > Doors/Access > Digital Key.

2. Place device on wireless charging tray.

3. At this point, you may open either the My BMW App to continue with automatic pairing, or, you may manually enter the pairing token received via email.

4. Please wait while Digital Key is created.

5. Your Digital Key is now ready for immediate use.

6. Open Wallet app. Confirm Digital Key is present.

7. Tap 📱

8. Please note for iPhone device users: Ensure Express Mode is switched on. This allows vehicle access even in the event the smartphone battery dies.
BMW DIGITAL KEY.
Deleting Main Key.

The “Main Key” is the key of the vehicle owner and can be deleted via smartphone or iDrive at anytime.

Via Smartphone:
1. Open Apple Wallet / Google Pay / Samsung Pass App
2. Navigate to “Main Key”
3. Choose “Remove This Car Key” for iPhone
   Or “Delete Key” for Google / Samsung

Via iDrive:
1. Navigate to Digital Key Menu
2. Select the desired key
3. Choose “Delete”
BMW DIGITAL KEY.
Revocation of Shared Keys.

Shared Keys access can be revoked by both the Owner or a Shared Key user via two methods:

1. Via Apple Wallet / Google Pay / Samsung Pass App. Please note, for safety reasons when the owner revokes a shared key, the key will be in a “pre-deletion” state until another active key (digital or classic) uses the vehicle once. However, if a shared key user revokes their own access, it is immediate.

Or

2. Via the iDrive, with either the “Main Key” or physical key fob within the vehicle go to Settings > Doors > Digital Key > Select Shared Key.
Please note this action is immediate.
1. What are the vehicle requirements for BMW Digital Key?
Digital Key is included as part of the Comfort Access package on suitably equipped vehicles, the Digital Key feature will be active and available for setup and usage for as long as BMW supports it. A complete list of supported vehicles can be found on the BMW Service Availability Matrix on www.BMWUSA.com/ConnectedDrive. Additionally, users can activate their BMW Digital Key Card; a credit card shaped NFC card.

2. What are the smartphone requirements for BMW Digital Key and BMW Digital Key Plus?
- **iPhone**: BMW Digital Key is compatible with iPhone XR, iPhone XS, iPhone XS Max or later and Apple Watch Series 5 or later running on at least iOS 13.6 and watchOS 6.2.8 or later.
- BMW Digital Key Plus is compatible with iPhone 11 and later devices, and Apple Watch Series 6 or later. Running on software iOS 15 or later for iPhone, and watchOS 8 or later for Apple Watch. For more information can be found on: https://support.apple.com/en-us/HT211234
- **Google Pixel**: BMW Digital Key is compatible with Google Pixel 6 and Google Pixel 6 Pro running on Android™ 12 or later.
- **Samsung Galaxy**: BMW Digital Key is compatible with Samsung Galaxy S21, S21+ and S21 Ultra running on Android 12 or later.

3. Can I link my Digital Key to my driver profile?
Yes, when using your BMW Digital Key it acts as its own vehicle key paired with your Driver Profile. **Please note**: each profile can only be linked to a single device using Digital Key.

4. Can I share my Digital Key with friends and family?
Yes, you may share Digital Key with up to 5 friends and family members with compatible iPhone devices. When sharing multiple keys, the owner may be prompted to use their own key before sharing. Shared Key access can be sent with the option of certain driving restrictions (e.g. top speed limit and parameters) and can be revoked at any time. 
**Please Note**: Shared Key access with “Restricted Driving” is not available for M model vehicles.

5. Is there a Valet Mode?
All cars running iDrive 7 have Valet Mode. This is completely independent of Digital Key. 
**Please note**: owner is recommended to give Key Card or physical key fob to valet.

6. What happens if I upgrade my smartphone?
At anytime, if the owner replaces their smartphone device with a new compatible smartphone device, they can move the owner key over to the new smartphone. By creating a new key on the new phone the old one will be deleted. **Please note**: Shared Keys will not be deleted and will have to be sent new invitations.

7. Is Digital Key deactivation instant?
Yes, the deactivation of Digital Key is instant when completed from the iDrive. For safety reasons when the driver stops sharing a digital key, the deleted shared key will be in a “pre-deletion” state. The key will remain in a “pre-deletion” state until another active key (digital or physical fob) uses the vehicle. However, if a shared key user revokes their own access, it is immediate.
8. Can I still use Digital Key if my smartphone has no power, no cellular connection or is in airplane mode or low battery mode?
Depending on why your smartphone is powered down, the availability of Digital Key varies. Each model smartphone device has a safety feature allowing users to unlock/lock/start the vehicle without having to first unlock their smartphone, for up to 5 hours after the device has run out of battery or has a depleted battery. The device terms are:

- **iPhone**: Express Mode (enabled by default);
- **Google Pixel**: Lock Screen (enabled by default);
- **Samsung Galaxy**: Security-Require Authentication (disabled by default).

If these settings are manually changed or you have manually turned off your device, Digital Key will not work. Airplane mode, Low battery mode, and cellular connection has no effect on Digital Key operation.

**Please note**: this feature is not available for Apple Watch users.

9. Is Digital Key secure?
Yes. The key is saved on a chip on the smartphone called the “Secure Element”, which provides standardized hardware security as well as software security.

10. How do I lock my BMW with Digital Key?
All lock and unlock settings will natively transfer to the Digital Key. These settings are stored in iDrive and are customizable just like a regular key fob. All vehicle doors and the trunk must be closed before using the Digital Key which can only lock and unlock the vehicle at the driver's door handle.

11. Why can’t I pair my smartphone device with Digital Key?
If you are having issues connecting your device with Digital Key, please make sure your vehicle is in accessory mode as it is not possible to pair with the engine on.

12. When should I leave my paired device in the charging tray?
There are two instances in which the paired device should be left in the charging tray. 1) when starting the vehicle and 2) when using the trunk button on the interior of the driver's door. **Please Note**: These cases are not necessary for Digital Key Plus users with Comfort Access compatible devices.

13. My smartphone has been lost or stolen what do I do?
If you lost your smart device with the “Main Key” it is recommended to delete your device via the iDrive by following the steps located in this guide.

14. Why won’t my BMW Digital Key unlock my door?
In the rare case the BMW Digital Key doesn't work to unlock car, make the smartphones NFC Antennas are positioned correctly at the doorhandle when trying to unlock.
