# GET STARTED. ON-STREET PARKING INFORMATION.

Available as part of BMW ConnectedDrive, On-Street Parking Information is an intelligence service, which helps drivers locate available parking spaces in many major US cities. It uses historical and real-time data to determine the likelihood of finding vacant parking spots in a given area and displays the information right on your BMW Navigation Map. To use this service, parking information must be enabled.

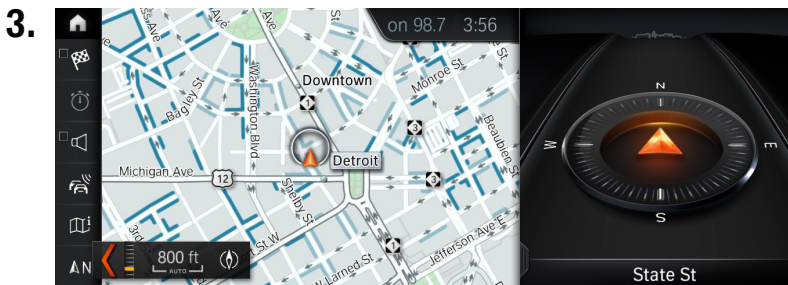

## Enabling & Accessing On-Street Parking Information.

Select **“Navigation”** from the main menu followed by **“Map.”** From map view, slope controller to the left to access side menu. Scroll down to **“Map content.”**

Check **“Parking information”** box to enable feature. Now, this service will monitor and display the on-street parking information around your current location when available.

When approaching the city, parking probability indicators will begin to populate on the map. The more prominent blue lines indicates high probability of vacant spaces. Faint blue lines indicates moderate probability of vacant spots. No color indicates restricted parking or low probability of vacant spots. Drive to the more prominent blue line areas for your best chance of finding a parking spot.

## FREQUENTLY ASKED QUESTIONS.

### 1. Is On-Street Parking Information available in every city?

On-Street Parking is currently available in select major cities. To check if this information is available in a particular city, go to “Navigation” and select “Settings.” Scroll down and select “Available on-street parking info” to view which cities currently have On-Street Parking Information.

### 2. Will On-Street Parking Information tell me about any parking restrictions?

Drivers must always check if parking permits are required, if meters need to be “fed,” or if any other restrictions apply before parking.

### 3. What do I need to be able to access On-Street Parking Information?

Vehicles must be equipped with at least iDrive 6.0 and have a subscription to parking information. For a list of vehicles available with On-Street Parking Information, please refer to [bmwusa.com/bmwassist](http://bmwusa.com/bmwassist) for service availability information.
