BMW CONNECTED DRIVE.
GET STARTED GUIDE.
BMW REMOTE 3D VIEW.
REMOTE 3D VIEW.
Available as part of the BMW Connected app, Remote 3D View allows you to view your vehicle from a 3D perspective, observe the surrounding area, and even capture an image all by using the app right from your phone. This can be helpful when checking on your vehicle remotely to ensure your vehicle is safe and secure. It’s also a fun way to create a unique picture of all the scenery around your car, wherever it may be.

HOW TO ACTIVATE AND USE REMOTE 3D VIEW.

First, select "CAR", then "Settings", followed by "General settings".

Under DATA AND DEVICES select “Data Privacy”.

If “All services incl. analysis” or “All vehicle services” is selected then Remote 3D View will be active.

If “Individual selection” is chosen, select and scroll to “Remote 3D View” to activate.

Please note: for iDrive 5 & iDrive 6 vehicles, select “My vehicle”, then “iDrive Settings”, followed by “Data privacy”. Next, select “Remote 3D View”, followed by checking the box which allows the app to access your vehicle’s on-board cameras.

© 2020 BMW of North America, LLC.
Open the BMW Connected app, then select the "Vehicle" tab.

Select the "Remote 3D View" button located above “History”.

Select "Show View" to view your vehicle and its location.

When accessing this feature for the first time a default image will be displayed. It is important to select *Refresh View* to begin using the feature.

By using your finger you can take a virtual walk around your vehicle.

*Pinch your fingers to zoom in and out on the view.*

You can take screenshots of your vehicle when selecting the camera button. Each screenshot taken will be automatically saved in the app. You will then be given an option to store a copy of the screenshot to your mobile phone.

To access the screenshot history on the app, select “Gallery” at the top right corner. The app keeps the history of all screenshots you have taken along with GPS information from the vehicle at the time the screenshot was captured.
